### Attestation/Use of Other Form

<b>Attestation Statement</b>			
<p><b>As stated in the February 28, 1992 United States Federal Register under Subpart H 493-801 (b) (1), "the individual testing or examining the samples and the laboratory director must attest to the routine integration of the samples into the patient work load using the laboratory's routine methods." The laboratory director or designee and the testing personnel must sign on the result form. Retain a signed copy of this page in your laboratory for your records and inspection purposes. If your laboratory requires additional space for signatures, copy this form as needed.</b></p>			
<p>We, the undersigned, recognizing that some special handling may be required due to the nature of proficiency testing (PT) materials, have as closely as is practical, performed the analyses on these specimens in the same manner as regular patient specimens. We confirm that results were not shared or PT specimens referred or tested outside our CLIA identification number.</p>
