Review Date	Version Number	Signature of reviewer

REVISION HISTORY

Date revised	Revision #	Changes made	Signature

I. PURPOSE:

Most laboratory records are used to support a regulatory function and are considered to be legal documents. Therefore, it is of critical importance that data integrity is understood and adhered to by everyone working in the laboratory.

II. POLICY:

All laboratory records, including but not limited to quality control data, temperature logs, intermediate test results or worksheets must be legible. All corrections to such records must be visible and erasure or use of correction fluid/tape is unacceptable. The identity of the person creating a record must be documented. For paper records this is normally done by the individual initialing and dating the record.

III. SCOPE:

All laboratory staff
