Purpose or Principle or Introduction	This procedure provides instructions on how to suspend and re-enable autovalidation or autoverification in Remisol Advance for Chemistry, ImmunoChemistry, Coagulation and Iris IQ 200 Urinalysis System.
Scope	All CLS and MLT who work on systems with autoverification capabilities have the access and right for this document usage.
Policy	 Suspend autoverification if: a. QC results are unacceptable even after thorough investigation and corrective action. b. Instrument malfunction. c. Failed calibration.
	d. Reagent problem.e. Any other situation where instrument results are suspected to be adversely affected, e.g. high temperature in the lab.
	 Re-enable autoverification if: a) QC results are acceptable. b) Instrument problem has been corrected. c) Calibration has passed. d) Reagent problem has been solved. e) Any other situation has been corrected and instrument result are now acceptable.
	Note: If unsure of what to do, it is good laboratory practice to find policies/instructions on Master Control, consult Manager, lead CLS or call the vendor hotline.
