What is a phone tree?

One of the most basic call treatments is a phone tree, which is a greeting followed by a menu of options that allows a caller to select the “route” of the call. Calls can be routed to phone numbers, other menus, greetings, and automatic call distribution (ACD) scripts.

Objective:

- 1. Improve response to picking up phone calls**
- 2. Direct caller to correct extension**
- 3. Reduce # of transferred calls**
- 4. Reduce time on hold**

Impact

1. **Expectations with Care Experience through our phone etiquette and the service we provide with internal and external customers.**

2. **Scripting: 4 elements**

Greeting Introduce yourself Lab Dept Area Inquiry

i.e. *“Good Morning, This is the Main Laboratory My name is Anthony. How may I help you?”*

3. **Every effort must be made to address the needs of the caller when a call is answered in order to avoid transfer**

4. **Utilize resources and features available**

5. **Reduce time on hold**
