Dearborn Point of Care CLIA License Maintenance

Document Type: Policy

I. PURPOSE AND OBJECTIVE:

Laboratories performing testing on patient specimens for the purpose of diagnosing, preventing or treating disease or for health assessments are required to obtain a Clinical Laboratory Improvement Amendments (CLIA) certificate that properly reflects the scope of testing performed by the laboratory.

II. POLICY STATEMENT:

- A. The Point of Care (POC) department at Dearborn oversees POC testing and monitors compliance for 2 CLIA licenses.
 - 1. Dearborn Laboratory (testing performed at the Dearborn hospital campus and under the auspice of POC)
 - 2. Dearborn Laboratory Limited Services (off-site testing performed under the auspice of POC)

III. PROCEDURE:

- A. POC will comply with the testing standards for the scope of service and will make updates to the CLIA licenses, as needed. The testing lists attached to this policy are sent to the State of Michigan, when changes are made or upon request. Test menus and locations are also maintained on the College of American Pathologists's website.
- B. Copies of the CLIA licenses are kept with Laboratory Administration. POC will distribute a copy of the Limited Services certificate to each off-site location upon request.
