_____

_____

THESE ARE DONE ON ALL PATIENTS

1ST Trimester Prenatal Labs

CBC No Diff

Hepatitis B Virus Surface Antigen (HBSAG) w/ Reflex to viral load

HIV Screen (HIV 1 Antigen, and 2 Antibodies) Qualitative, Immunoassay

Rubella IGG

Syphilis Antibody Screen, EIA

Urine Culture (In pregnancy)

Chlamydia/gonorrhea

Varicella Zoster Virus IGG

Hemoglobin A1C, Screening or Prediabetic monitoring

ABO-RH, Prenatal

Indirect Coombs Test, Prenatal

THESE ARE DONE ON SPECIFIC PATIENTS

Other Prenatal Screening

Cystic Fibrosis, CTFR, Common Variants

Spinal muscular atrophy, SNM1 and SNM2, carrier testing

Hemoglobin Fractionation, Chromatography (aka Hemoglobin Electrophoresis)

1st Trimester Screen, California (PAPP-A, HCG (Optional)

(NIPT) Trisomy 21, 18, 13 Aneuploidy Analysis w/ Sex Chromosomes, Maternal Blood, Directed CFDNA Analysis (Offers to patients that are AMA only)

KRMS/KPHC LAB FUNCTIONS

For each Patient, we should be verifying their orders by using the following:

1. You should have the DAR (Dept Appts.) Open at all times in KPHC.

   📋 DAR - Dept Appts

   a. When a patient arrives at your phlebotomy station, you can double click their name in the Dept. Appts. list and their appointment details should appear in a pop-up.
   b. Their linked orders will appear under the "Appointment Orders" section.

Appointment Orders

Order #	Category	Procedure	Appointment Association

2. When pulling up orders in KRMS - you must verify the linked orders you saw under the appointment tab in KPHC by going into the **SO** function and the **OE** function to account for all tests before drawing the patient.
