Use of the SmartShip WebApp

Purpose

This procedure provides instructions for utilization of the SmartShip WebApp in generating SmartShip Labels and tracking of different types of specimen transportation packages between Kaiser Permanente Southern California Medical Center Service Areas and SCPMG Regional Reference Laboratories (RRL).

Adherence to this procedure ensures that appropriate specimen transports are monitored and maintaining specimen integrity.

Scope

This procedure is intended for SCPMG Laboratory Care Delivery System staff who oversee or are responsible for processing, packing, transporting, and receiving specimens between Kaiser Permanente Southern California Medical Centers, Medical Office Buildings, and Regional Reference Laboratories.

Policy

- SmartShip location placard must be visibly displayed in pickup/delivery area of each lab.
 - Every tote being shipped requires a new SmartShip Label, which contains a unique tracking ID. Duplicates/copies shall **NOT** be used.
 - SmartShip Labels must be created when tote/package is ready for pick-up (**DO NOT** print labels in advance).
 - SmartShip Label must be inserted into tote window with address of receiving laboratory and barcode visible.
 - Laboratory staff are to provide NUID and signature acknowledging number of totes to be picked up and delivered.
 - If courier has both a pickup and delivery at the same time, Laboratory staff will be required to sign twice, once for each transaction.
-

Continued on next page

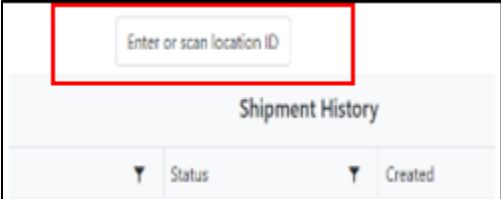

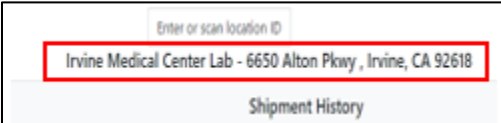

Use of the SmartShip WebApp, Continued

Before you begin

- The SmartShip WebApp continuously updates the status of shipments and is managed by the SCAL Regional Laboratory Couriers (Integrated Transportation Services (ITS) department) for the Laboratory Care Delivery System
 - Additional information for this department and services provided (schedules, contact information) are found on LabNet.
- Contracted courier services (contracted by ITS or directly by a local laboratory) cannot scan SmartShip Labels
 - For contract courier services, Laboratory staff will scan for shipments as delivered

Procedure- Create Shipment

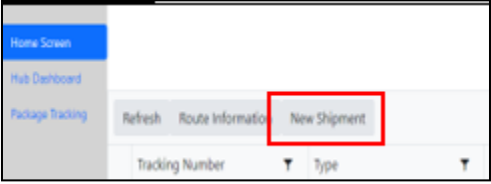

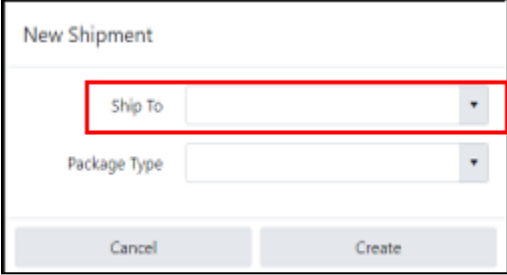

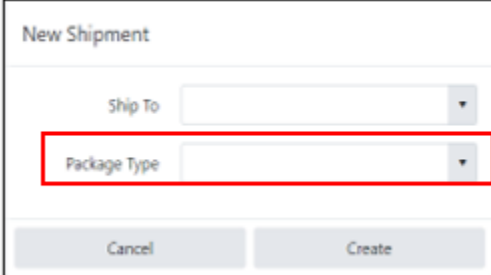

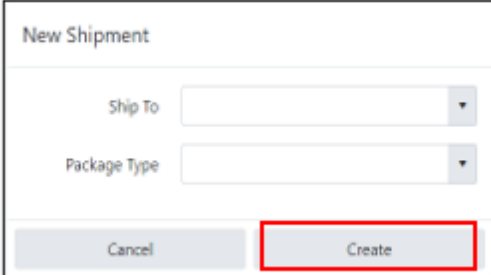

Follow the steps below to create a shipment tracking label using the SmartShip WebApp. Steps also describe how to cancel shipments and reprint shipment tracking label.

Step	Action
1	Go to SmartShip Website or Access via LabNet https://kaiser.pactrac.net/KPCourier/Identity/Account/Login
2	Enter your NUID and Password, click <u>Log In</u> button • If you forgot your password, click <u>Forgot your password</u>
3	Click in box labeled (<i>Enter or scan location ID</i>) and scan location ID using laminated sheet or manually enter location ID <div style="text-align: center;">  </div> <p>Lab name and address will be displayed, along with shipment history for the location</p> <div style="text-align: center;">  </div>

Procedure- Pickup and Delivery

Follow the steps below to document the pickup and/or delivery of shipments by the courier

Step	Action
1	Upon arrival to the lab, the courier will scan the location laminated barcode placard <ul style="list-style-type: none"> • Please ensure placard is accessible for courier in designated pick-up/drop-off areas
2	The courier will then scan the barcode on the SmartShip Label on the totes/packages being collected and/or delivered. <ul style="list-style-type: none"> • If there are packages to be collected and delivered at the same time, the courier will perform 2 separate transactions on their phone, once for the collection and once for the delivery. Laboratory staff will be required to sign twice, once for each transaction (collection and/or delivery)
3	Courier will ask the laboratory staff for their NUID, then present the phone for a signature (use finger or stylus to sign). <div style="display: flex; align-items: center; margin-top: 10px;">  <div style="margin-left: 20px;"> <p><i>Package Count</i></p> <p><i>Tracking numbers (scroll to see all numbers)</i></p> <p><i>Signature area</i></p> </div> </div>
4	In the event that the location is closed (laboratory staff not present) courier will not be required to obtain a signature from laboratory staff. <ul style="list-style-type: none"> • Laboratory should follow local processes to determine/verify that staged totes have been picked up by courier.

Procedure- Receiving Packages/Totes

The SmartShip WebApp receiving function is to be used by laboratory staff in the following scenarios:

- Any courier not using the SmartShip system (i.e Local route courier did not use iPhone to scan and obtain a laboratory staff signature)
- Package was delivered by 3rd party courier (i.e A-Line, MCI, etc)

Step	Action
1	When the courier is unable to scan inbound deliveries in the SmartShip app follow the steps below
2	Log into the SmartShip WebApp
3	Click on the <u>Inbound box</u> in the top right-hand corner of the screen 
4	Click on the <u>Receive Tracking #</u> button 
5	Scan/Enter the SmartShip Label barcode/number in the <u>Enter Tracking #</u> field
