	Critical Laboratory Values	Department:	Pathology
		Effective Date:	June 4, 2019
		Revised Date:	NEW
		Contact:	Laboratory Compliance, QA and Safety
Name & Title: Gregory Pomper, MD, Laboratory Director, Department of Pathology			
Signature: 		Date Approved: 6/12/19	

1) General Policy Statement:

It is the policy of the Wake Forest Baptist Health to define the critical values and critical results that are appropriate for the patient population served. The critical values have been developed by the laboratory in consultation with relevant clinical teams and are defined for each laboratory in the Wake Forest Baptist Health Online Test Directory.

- a) **Scope:** All WFBH Department of Pathology employees, faculty and staff are responsible for complying with this policy.
- b) **Responsible Department/Party/Parties:**
 - i. Policy Owner: Department of Pathology
 - ii. Procedure: Laboratory Compliance, QA and Safety
 - iii. Supervision: Department of Pathology Section Managers
 - iv. Implementation: Department of Pathology

2) Definitions: For purposes of this procedure, the following terms and definitions apply:

- a) **WFBH:** Wake Forest Baptist Health and all affiliated organizations including, WFBMC and all on-site subsidiaries as well as those off-site governed by WFBH policies and procedures.
- b) **Policy:** As defined in the Policy on Creating and Amending Policy, a statement of principle that is developed for the purpose of guiding decisions and activities related to governance, administration, or management of care, treatment, services or other activities of WFBH. A policy may help to ensure compliance with applicable laws and regulations, promote one or more of the missions of WFBH, contain guidelines for governance, and set parameters within which faculty, staff, students, visitors and others are expected to operate.
- c) **Critical Value:** A value at such variance with normal as to represent a pathophysiologic state that may be life-threatening unless some action is taken in a very short time for which an appropriate action is possible.
- d) **Online Test Directory:** The information here includes a directory of organizational listings, services provided and helpful tables. The Online Test Directory outlines the policies and services of the laboratories. This online version includes a directory with organizational listings for all divisions of the anatomic and clinical departments, with key locations, personnel, and phone numbers and a complete test list. There is also a listing of helpful tables covering items such as Reference Ranges, Critical Laboratory Values, order of draw, tube types and other useful information.

3) Policy Guidelines:

a) Critical Value List Update Procedure

1. The WFBMC CLIA Laboratory Director and the Laboratory Compliance, QA and Safety will oversee changes to the list of Critical Laboratory Values. Changes may originate from a variety of sources including but not limited to request from clinical providers.
2. The CLIA Laboratory Director will approve all critical value requests and will communicate the approval to the testing laboratory and the Laboratory Compliance, QA and Safety.
3. The testing laboratory will be responsible for the processes involved in the change including but not limited to open an IT ticket, perform IT testing activities, update laboratory procedures and communicate the change system-wide through the SBAR notification process.
4. The Lab Compliance, QA and Safety will update the Critical Values List in this document and will work with the IT Pathology Research Team to update the Critical Values List on the Online Test Directory (Pathology Handbook).
5. Biannually, the Lab Compliance, QA and Safety will email the list of Critical Laboratory Values to the Section Managers for review. If a change is identified, steps (3) and (4) above apply.

b) List of Critical Laboratory Values

The Critical Values for each department, hospital and off-site laboratories are listed in this document and are published on the Online Test Directory (Pathology Handbook). The link to the Online Test Directory is <http://pathoweb01pv:8080/labhandbook/index.html>.

4) Review/Revision/Implementation:

- a) **Review Cycle:** The policy itself shall be reviewed every two years. The critical values shall be reviewed by the Laboratory Director annually.
- b) **Office of Record:** Laboratory Compliance, QA and Safety.

5) Related Policies:

Calling Critical and/or Corrected Values
Critical Results of Tests and Diagnostic Procedures
Communication of Significant or Unexpected Findings
Online Directory Additions and Modifications Policy

6) Governing Law or Regulations:

- a) COM.30000, COM.30100 and GEN.41316. CAP Accreditation Program, All Common and Laboratory General Checklist, 08.22.2018.
- b) National Patient Safety Goals - NPSG.02.03.01. The Joint Commission E-dition, January 1, 2019.
- c) 493.1291(g) - Standard: Test Report. Clinical Laboratory Improvement Act of 1988 (CLIA), Rev. 166, 02-03-17.

7) Attachments:

List of Critical Laboratory Values

8) Revision:

Review/ Revision Date	Revision	Signature
<p>June 3, 2019</p>	<p>1/5/2019: Chemistry: Added Troponin I critical value of >0.040 ng/ml (Adult & Pediatric) for ED only. Notification of implementation to Core Lab via email on 1/24/2019.</p> <p>1/7/2019: (a) Point of Care: Added NOVA Glucose Meter critical value of <50 or >400 for Adult & Pediatric and <50 or >200 for Neonate by POC Department. (b) Removed Anatomic Pathology section and transferred to SOP: <i>Communication of Significant or Unexpected Findings</i> by Lab Compliance, QA and Safety.</p> <p>3/7/2019: Retired "Critical Values All campuses 092916 updated 010719" excel file.</p> <p>WFBMC: (c) Chemistry: Section/Formatting changes. Moved Serum Osmolality from Hematology to Chemistry. (d) Coagulation: Deleted Derived Fibrinogen. Added Not Calculated to Fibrinogen. Email dated 02/19/2019 from Hematology Manager. (e) Critical Care Blood Gas: Added to Critical Value list. Reviewed by Critical Care Department Manager email dated 3/8/2019. (f) Hematology: Removed Peripheral Smear from list and moved to <i>Communication of Significant or Unexpected Findings Policy</i>. CLIA Laboratory Director and Hematology Manager on 2/20/2019. (g) Microbiology: Added Meningitis-Encephalitis Panel (ME Panel). Added Rapid Malaria Antigen. Removed Blood Culture (ANA). Email dated 02/22/2019 and 3/18/2019 from Microbiology Manager. (h) Serology: Updated CMV-PCR (Quantitative) critical to First+ at >1000 IU/ml. Deleted Rocky Mountain Spotted Fever. Streamlined HSV 1 and 2 PCR and separated critical value by age group and sample site. Email dated 02/22/2019 from Microbiology Manager. (i) Urinalysis: Section/Formatting changes. Created Urinalysis Section and moved Urine Ketones from Hematology to Urinalysis. (j) Point of Care: Changed i-STAT Glucose from <40 to <50 on the low end for all age group. Added PCV to i-Stat Hematocrit. Deleted duplicate listing for pCO₂ and pH. Email dated 02/28/2019 from POC.</p> <p>Davie Medical Center: (a) Coagulation: Added Heparin PTT critical value of ≥120.0 seconds. Email from DMC Laboratory Manager dated 03/07/2019. (b) Urinalysis: Section/Formatting changes. Created Urinalysis Section and moved Urine Ketones from Hematology to Urinalysis.</p> <p>May 30, 2019: Lexington Medical Center Email dated 03/14/2019 from LMC Laboratory Manager. (a) Chemistry: Updated Acetaminophen from ≥40 to ≥20 μg/ml, Total Bilirubin from ≥16.0 to ≥18.0 mg/dl, Calcium from ≥12.0 to ≥13.0 mg/dl, Valproic Acid from ≥120 to ≥150 μg/ml and Vancomycin Trough from ≥40.0 to ≥25.0 μg/ml. Added Phosphorous, Salicylate, Lithium critical value. Added critical high for Magnesium. Deleted BUN, Total Carbamazepine, Creatinine, Creatinine for CRCL, Phenobarbital and Theophylline. (b) Hematology: Added Fibrinogen critical value of 100 mg/dl. Updated Hemoglobin – Age ≤1M from 8.0% to 7.0% and Hematocrit from ≤24.0% to ≤21.0%. (c) Added critical values for Critical Care Blood Gas.</p> <p>June 3, 2019: Added Critical Laboratory Values for Cornerstone Westchester Lab and Cornerstone Lab West.</p>	<p><i>MJ McGinnis</i> 6/12/2019</p>

Critical Laboratory Values Wake Forest Baptist Medical Center

REVISION: 03/2019

Test	Low	High	Comments
Chemistry (Core Lab)			
Acetaminophen		>20 µg/mL	
Amikacin Peak		>30.0 µg/mL	for outpatients
Amikacin Trough		>10.0 µg/mL	for outpatients
Bilirubin Total - Age <1M		>18.0 mg/dL	
Calcium	<6.0 mg/dL	>13.0 mg/dL	
Carbamazepine Total		>20.0 µg/mL	
CO2 Total	<10 mmol/L	>40 mmol/L	
Digoxin		>2.0 ng/mL	
Gentamicin Peak		>10.0 µg/mL	for outpatients
Gentamicin Trough		>2.5 µg/mL	for outpatients
Glucose - Age ≥18Y	<50 mg/dL	>600 mg/dL	
Glucose - Age 7D-18Y	<50 mg/dL	>300 mg/dL	
Glucose - Age 0D-7D	<45 mg/dL	>300 mg/dL	
Lactic Acid		>4.0 mmol/L	
Lithium		>2.0 mmol/L	
Magnesium	<1.0 mg/dL	>6.0 mg/dL	
Osmolality, Serum	<246 mOsm/kg	>334 mOsm/kg	
Phenobarbital		>40.0 µg/mL	
Phenytoin/Dilantin - Age ≥18Y		>30.0 µg/mL	
Phenytoin/Dilantin - Age 0D-18Y		>20.0 µg/mL	
Phosphorus	<1.0 mg/dL	>12.0 mg/dL	
Posaconazole, LC, Tandem Mass Spec		≥4.00 µg/mL	
Potassium - Age ≥1Y	<3.0 mmol/L	>6.0 mmol/L	
Potassium - Age 3M-1Y	<3.0 mmol/L	>6.5 mmol/L	
Potassium - Age 1M-3M	<3.0 mmol/L	>7.5 mmol/L	
Potassium - Age 7D-1M	<3.0 mmol/L	>7.0 mmol/L	
Potassium - Age 0D-7D	<3.0 mmol/L	>6.2 mmol/L	
Salicylate		≥30.0 mg/dL	
Sodium	<120 mmol/L	>160 mmol/L	
Theophylline		>30.0 µg/mL	
Tobramycin Peak		>10.0 µg/mL	for outpatients
Tobramycin Trough		>2.5 µg/mL	for outpatients
Troponin I		>0.040 ng/ml	ED only (Adult and Pediatric)
Valproic Acid - Age ≥18Y		>150 µg/mL	
Valproic Acid - Age 0D-18Y		>120 µg/mL	
Vancomycin Trough		>25.0 µg/mL	
Voriconazole, LC, Tandem Mass Spec		≥5.6 µg/mL

Varicella Zoster PCR	+	+	blood/sterile sites only
Urinalysis			
Ketones Urine - Age <1Y		>=80 mg/dL	

Referral Laboratory Results

All referral laboratory results received in Pathology will be reviewed by a medical technologist or equivalent for the purpose of identifying those results which are designated as critical values by the referral laboratory. These values will be communicated to the appropriate caregiver, per our policy.

Point-of-Care Testing (POCT) Critical Value Limits

Defined for Point of Care Testing by the Clinical Laboratory
in Conjunction with the Medical Directors for POCT User Sites

REVISION: 03/2019

Analyte	Method	Adult	Pediatric	Neonate	Comments
Glucose mg/dL	Abbott Precision Xceed Pro	<50 or >400	<50 or >400	<50 or >180	
Glucose mg/dL	NOVA	<50 or >400	<50 or >400	<50 or >200	
Glucose mg/dL	i-STAT	<50 or >600	<50 or >300	<50 or >300	
Hematocrit % PCV	i-STAT	<=18 or >=60	<=18 or >=60	<=18 or >=60	
Hemoglobin g/dL	i-STAT	<=6 or >=20	<=6 or >=20	<=6 or >=20	
INR Value (PT/INR)	i-STAT	>=5 or value not calculated	>=5 or value not calculated	>=5 or value not calculated	INR values equal to or greater than 4.0, as reported by i-STAT will have a reflex venous PT/INR ordered and sent to the Clinical Laboratory for confirmatory testing.
Ionized Calcium mmol/L	i-STAT	<0.75 or >1.40	<0.75 or >1.40	<0.80 or >1.40	
pCO2 mmHg	i-STAT	<25 or >60	<30 or >80	<35 or >80	
pH	i-STAT	<7.2 or >7.6	<7.15 or >7.6	<7.20 or >7.45	
pO2 mmHg	i-STAT	<50	<30	<30	Arterial
Potassium mmol/L	i-STAT	<3.0 or >6.0	<3.0 or >6.0	<3.0 or >6.0	Unexpected results >6 should be verified by the laboratory. Hemolysis falsely elevates results. For potassium results to be considered critical, they should also fail the normal range defined for the patient's age.
Sodium mmol/L	i-STAT	<120 or >160	<120 or >160	<120 or >150	
Total CO2 mmol/L	i-STAT	<10 or >40	<10 or >40	<10 or >40
