

Central Processing RL6s November 2021

11/1/2021	Ammonia lost between CP and chemistry
11/5/2021	24-hour urine was processed and tested under random urine orders from AOT. Wrong results posted and had to be removed. Test credited. When error found, sample was too old to be tested.
11/8/2021	2 samples not received on a packing list. No specimen issues email sent. Provider called asking about tests days later.
11/9/2021	Wrong provider entered for one-click registration
11/9/2021	Unspun sample placed in spun rack on chemistry track. Results autoverified; had to be repeated and corrected.
11/10/2021	Urine for UA and hold from ED - went to micro first, QNS for UA testing. Delayed results.
11/10/2021	Gold top tube not received from a packing list (packing list not reconciled). Sample stored in chemistry without being tested. Patient had to get new sample collected.
11/11/2021	Cytolyt added to a Wound Culture specimen. Test had to be canceled as Cytolyt made sample unsuitable for culture.
11/19/2021	Pedi green tube lost. Found in CP trash 13 hours after collection.
11/19/2021	CSF dropped off at window. Not processed by CP. Went straight to Cytology. Physician called to inquire about results 4 days later. When found, sample was out of stability for testing.
11/20/2021	Pedi green tube from Peds ED found in trash. Found 2 days after collection. New sample already collected and tested.
11/24/2021	Sample for Vitamin B12 not scanned. Stored in chemistry without being tested. When error was found, sample was too old to test.
11/29/2021	24-hour urine was left on the Spin counter overnight without being processed. When sample was investigated, stability was exceeded for testing. Sample had to be recollected.
11/29/2021	CBC was centrifuged
11/29/2021	CBC was centrifuged
