

APPENDIX OF STAT BRL SPECIMEN DELIVERY LIST

RC.CH.LOP.SH.PR.007A.r02

Order the test with STAT priority for it to be run as STAT

Deliver all BRL/Outreach Stat test requests to the BRL Stat Drop-off rack in the Clinical Pathology Processing Area. The CP Processing staff will forward to appropriate laboratory section.

Tests performed in Stat Lab:

- Alcohol (Ethanol)
- Ammonia
- Beta Hydroxybutyrate
- Blood Gases: pH, PCO₂, PO₂, O₂ saturation, HCO₃, tCO₂, Critical Care Panels
- Calcium, ionized (Ca⁺⁺)
- Carboxyhemoglobin
- Green Room Panel
- HIV Source Test
- Fetal Fibronectin FFN
- OB Rapid HIV
- Lactic Acid
- Monospot (Stat)
- Neonatal Bilirubin
- Occult Blood (Stat gastric)
- Occult Blood (Stat stool)
- pH, venous
- Pre-OP INR
- Uric Acid – Rasburicase

Tests performed in Special Testing Department:

- G-6-PD
- Hgb S Quantitation by HPLC

Panels and other priority requests:

- All other priority requests for Chemistry and Immunoassay are loaded directly into an Accelerator sample rack and loaded onto the sample handler. If the track conveyor belt is not operational, then deliver samples to Technologist at the middle Chem line station.
