

Blood Bank Huddle Notes

9/13/2023

Please make sure you sign online at the MTS site

I. Blood Bank Updates

a. Procedures to READ and SIGN

- i. Please make sure you have read and signed off on the following new/revised SOPs located on the MTS website:
 1. Investigation of Cold Reacting Antibodies
 2. Transfusion Services Criteria for Specimen Acceptability
 3. Tissue Complication / Adverse Reaction Policy

II. Corewell Health Updates

a. Password Management: New Password Creation Requirements & Self-Service Portal

- i. On September 5, new requirements for password creation took effect for all Corewell Health and Priority Health team members. Once your password expires, team members are required to create a strong password with a minimum of 12 characters, and the new password expiration is 365 days for a standard account.
- ii. This fall, a new password self-service portal will be the enterprise-wide standard used by all team members who need to reset their password due to expiration or lockout. This portal will be accessible anywhere and will utilize PingID multi-factor authentication (MFA) for verification, enhancing security and ease of use. Once deployed, this portal will replace the legacy Beaumont pss tool (pss.beaumont.org).

b. The Well

- i. Last week was the launch of Corewell Health's new, unified intranet, The Well. This new platform combines our four intranets into one while still maintaining regional customization.
- ii. Pre-existing sites and their links on Corewell Health West, Corewell Health South, and Priority Health intranets will not change or need to be recreated. Sites from Legacy Beaumont Health have already been migrated over.

c. Wave 3 System Integration Updates

- i. This week the Integration Management Office (IMO) kicked off Wave 3 of the integration
- ii. 16 functional areas have been integrated, and there will be eight additional teams added in Wave 3. Wave 3 includes the following eight clinical shared services:
 - Behavioral Health
 - Care Coordination
 - Continuing Care (excluding Rehabilitation)
 - Imaging
 - Laboratory
 - Mission Control / Transfer Center
 - Population Health Management
 - Research Operation

I will keep you updated on changes as I become aware of them.

III. Versiti Updates

- a. Until further notice, the irradiator will be out of service starting Thursday, September 14th.** The irradiator that is located at the Livonia Distribution Center is going to be moved on Thursday, ahead of our physical relocation. This is due to our vendor constraints, as we are unable to reschedule the move and installation of the equipment.
- b. Wet Workshop**
 - i. Thursday, November 2nd at the Grand Rapids center.
 - ii. This workshop's topic will be managing urgent transfusions.
