## Note the short INR of 0.5 consistent with NOVO 7 therapy.

We now have a new code "INRN7" for these patients.

I am unsure of the baseline APTT for this patient but notes indicate <1% FIX, previous inhibitor and anaphylaxis to FIX

## **Active Issues**

- 1. Haemophilia B, 03/10/2019
- 2. Haematuria, 19/11/2019
- Multiple cystoscopies + clot evacuation
- 3. Bladder calculus, 18/11/2019
- 4. Urinary tract infection, 19/11/2019
- 5. Iron deficiency anaemia, 19/11/2019

## Relevant Medical History:

- 1. Haemophilia B
  - Severe: baseline factor IX <1%</li>
  - Cx inhibitor development; previous anaphylaxis to FIX
  - Cx haemophilic arthropathy
- 2. Depression/anxiety
- 3. Addiction disorder
- 4. Chronic pain
  - 2' haemophilic arthropathy
  - 2' spinal haemorrhage age 14yo
- 5. Right hip dysplasia
- 6. Compartment syndrome
- Fasciotomy + skin grafts Aug 2018
- Dental extractions 2018
