

# Order of Draw

## VACUETTE® Blood Collection Tubes

-  Blood Culture/Discard Tube 
-  Coagulation/CTAD\* 
-  Serum with and without gel 
-  Heparin with and without gel 
-  EDTA with and without gel 
-  Glucose 
-  All others 

\* When drawn first, then only suitable for routine tests (i.e. PT and aPTT).

In cases where blood culture tubes are not required, GBO recommends the use of tubes without additive.

NOTE: Always follow your facility's protocol for order of draw.
