

SCC-LIS_TIP OF THE WEEK

MODULE: SoftLab/SoftBank	SOFTWARE VERSION: 4.0.8
TOPIC: iEHR and EMR Electronic Data Repositories	ISSUE DATE: 13APR2018
DISTRIBUTION: End Users_All	PAGE: 1 of 1
ISSUED BY: M-L Dufresne-Anderson, Territorial LIS Administrator	

TOPIC/QUESTION:

What’s the scoop on “iEHR” and “EMR”?

ANSWER/TIP:

iEHR=AlbertaHealthNetViewer

EMR=TelusWolf System

Both are electronic data repository systems for laboratory results. They allow healthcare providers to look up patient results electronically.

iEHR vs EMR COMPARISON TABLE

FAQ's	iEHR	EMR
Acronym For?	interoperable Electronic Health Records	Electronic Medical Records
Other Names?	HealthNet Viewer---Viewer---HNV	Telus Wolf---Wolf
Am I supposed to have access?	Yes	No
What Can I Do With Access?	1→Report EMPI Demographic Discrepancies. 2→Look up results such as when LIS or Printers are Down.	N/A
When do SCC results feed?	Results will be visible in HealthNet Viewer usually 1-2 minutes after being released from LIS.	Results from the LIS are sent to EMR via an integration engine and the file sits in a download folder until a member of the EMR team manually uploads it. The EMR team endeavours to upload results 2-3 times per day on weekdays... once in the early morning, once mid afternoon. **It is perfectly normal not to see a result in EMR for almost half a day after it has been released. If released late on a Friday it will not be there until Monday** For the most part all NWT locations are LIVE on EMR now and the project is considered complete.
Do Dynalife Results Feed?	Yes	Yes for same locations as SCC
Do Prov Lab Results Feed?	Yes	Yes (since Feb2016) for same locations as SCC
