SCC-LIS_TIP OF THE WEEK

MODULE: SoftLab	SOFTWARE VERSION: 4.0.8
TOPIC: Fecal Immunohistochemical Testing (FIT)	ISSUE DATE: 01JUNE2018
DISTRIBUTION: End Users_All	PAGE: 1 of 1
ISSUED BY:April Darrach, Territorial LIS Administrator	

TOPIC/QUESTION:

A patient just dropped this sample off? What is this and how do I order this?

ANSWER/TIP:

These are the new fecal immunochemical testing (FIT) containers. They are replacing the card Occult Blood testing kits.

- The test code set in the LIS is **FIT**
- The Workstation is set as REF. It can be added to the REF tasklist to print the manifests for sending off to the Referral Lab
- If giving a patient a FIT container as indicated on the ordering requisition for a "take-home" collection – the KIT1, KIT2, KIT3 ordering keypad has the option for FIT
