Laboratory Staff Meeting Minutes
05 September, 2018
11:15 to 11:27

1. Workstation Redirection for CBC's
   a. April, from the LIS Team indicated that workstation redirection is an undesirable solution for group tests, such as CBC.
   b. Workstation redirection creates a significant number of issues when resulting back test results and when the test no longer requires redirection.
   c. This LIS team will put together a proposed process flow for those tests and situations that workstation redirection works very well for and those for which workstation redirection should be avoided.
   d. Proposed workflows will be presented at future staff meetings at the Laboratory Leaders Forum for discussion.

2. Round Table
   a. No items for Roundtable
