

NWT LIS TIP OF THE WEEK

Module: SoftLab

Software Version: 4.0.8

Topic: Print Scheduler Runs **INUVIK**

Issued On: 10JUNE2019

Distribution: All Users **INUVIK**

Page: 1 of 1

Issued By: M-L Dufresne, Territorial LIS Administrator

TOPIC/QUESTION:

If I'm releasing patient or water results while working in **Inuvik**, when will they print?

ANSWER/TIP:

AUTOREPORTING	All STAT priorities and results showing an LIS PANIC flag get autoreported <i>as soon as all</i> tests in the reporting chapter are verified/released.									
PRINT SCHEDULER	All orders with Routine, ASAP, Timed or Mixed priorities which have no panic values in the reporting chapter will enter a queue and be released on a schedule according to patient type once <i>all</i> tests in the reporting chapter are verified/released.									
PATIENT TYPE	INUVIK RUNS									
E-Emergency (HAYCB, HAYER, IER, SER)	5:12	5:42	6:12	6:42	7:12	7:42	8:12	8:42	9:12	9:42
	10:12	10:42	11:12	11:42	12:12	12:42	13:12	13:42	14:12	14:42
	15:12	15:42	16:12	16:42	17:12	17:42	18:12	18:42	19:12	19:42
	20:12	20:42	21:12	21:42	22:12	22:42	23:12	23:42		
H-Homecare (FSHC, FSMW, FSPH, HAYPH, HDEC, IHC, IPH, SHC, SOHS, YMHC, YPH)	12:34					16:34
