

# NWT LIS TIP OF THE WEEK

**Module:** SoftLab

**Software Version:** 4.0.8

**Topic:** Print Scheduler Runs **SLAB**

**Issued On:** 10JUNE2019

**Distribution:** All Users **SLAB**

**Page:** 1 of 1

**Issued By:** M-L Dufresne, Territorial LIS Administrator

**TOPIC/QUESTION:**

If I'm releasing results from the LIS while working at **Stanton**, when will they print?

**ANSWER/TIP:**

<b>AUTOREPORTING</b>	All <b>STAT</b> priorities and results showing an LIS <b>PANIC</b> flag get autoreported as soon as <u>all</u> tests in the reporting chapter are verified/released.									
<b>PRINT SCHEDULER</b>	All orders with Routine, ASAP, Timed or Mixed priorities which have no panic values in the reporting chapter will enter a queue and be released on a schedule according to <b>patient type</b> once <u>all</u> tests in the reporting chapter are verified/released.
