

# NWT LIS TIP OF THE WEEK

**Module:** SoftLab

**Software Version:** 4.0.8

**Topic:** CSF OE Keypad

**Issued On:** 20JUNE2019

**Distribution:** All Users

**Page:** 1 of 1

**Issued By:** M-L Dufresne, Territorial LIS Administrator

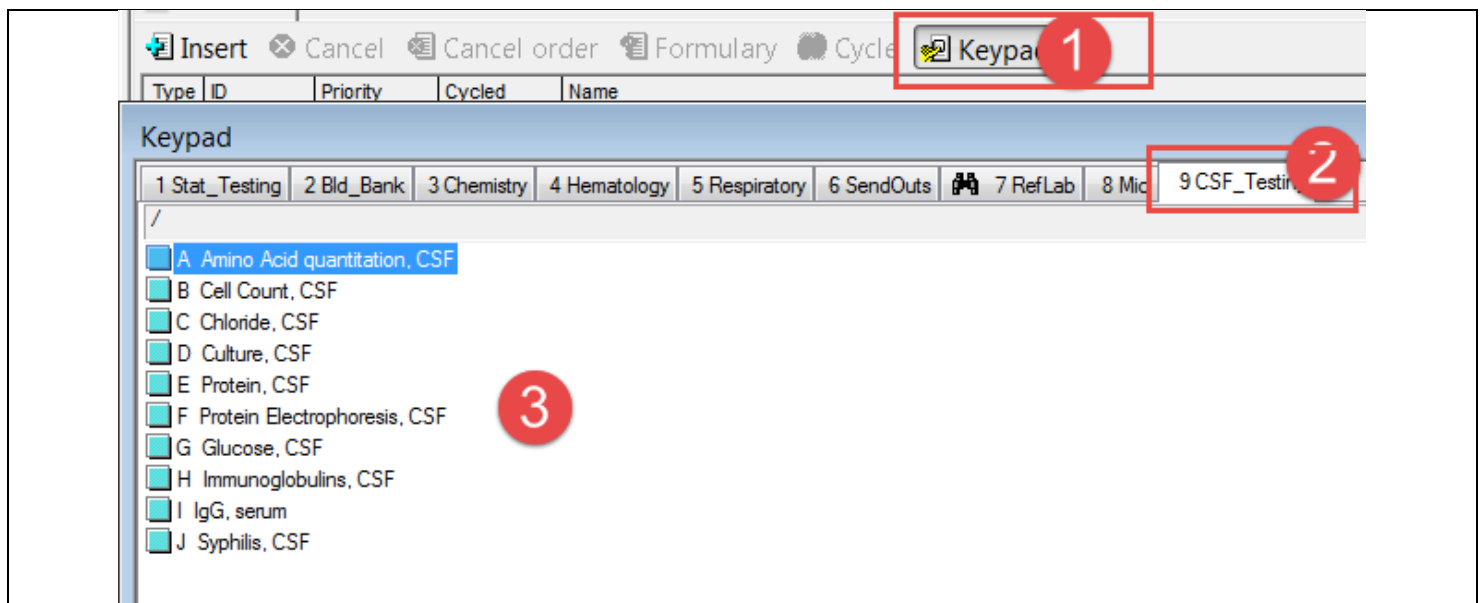

## TOPIC/QUESTION:

When receiving a CSF sample, how can I most efficiently accession all the tests ordered?

## ANSWER/TIP:

There is now a specific tab on the Order Entry Keypad that rounds up all the orderable CSF codes that are in the system. Go to Order Entry Keypad Tab #9 and mark off the required tests relating to the CSF sample

## EXAMPLE:

The screenshot shows the LIS software interface. At the top, there is a menu bar with options: Insert, Cancel, Cancel order, Formulary, Cycle, and Keypad. The 'Keypad' option is highlighted with a red box and a red circle containing the number 1. Below the menu bar is a table with columns: Type, ID, Priority, Cycled, and Name. The table contains several tabs: 1 Stat\_Testing, 2 Bld\_Bank, 3 Chemistry, 4 Hematology, 5 Respiratory, 6 SendOuts, 7 RefLab, 8 Mic, and 9 CSF\_Testing. The '9 CSF\_Testing' tab is highlighted with a red box and a red circle containing the number 2. Below the table is a list of tests with checkboxes. The first test, 'A Amino Acid quantitation, CSF', is selected with a blue checkbox and highlighted with a red circle containing the number 3. Other tests include B Cell Count, CSF; C Chloride, CSF; D Culture, CSF; E Protein, CSF; F Protein Electrophoresis, CSF; G Glucose, CSF; H Immunoglobulins, CSF; I IgG, serum; and J Syphilis, CSF.

**\*\*If at any time the content of the CSF keypad needs adjustment to reflect more current ordering practises please contact the LIS Administrator\*\***
