

**PURPOSE:** To ensure microbiology Category B specimens are being sent for referral testing to the National Microbiology Laboratory (NML) appropriately.

## **SAMPLE INFORMATION:**

The following organisms need to be sent to NML as part of the International Circumpolar Surveillance (ICS) program:

- Streptococcus pneumoniae from invasive sites
- Streptococcus pyogenes (GAS) from invasive sites
- Streptococcus agalactiae (GBS) from invasive sites
- Haemophilus influenzae from invasive sites
- Neisseria meningitidis from invasive sites

## **SUPPLIES:**

- Copan Transystem® Culture swab transport system (with or without charcoal)
- NML requisition

- Category B box
- Category B package supplies
- Biosafety fax coversheet
- FedEx waybill

## **SPECIAL SAFETY PRECAUTIONS:**

Containment Level 2 facilities, equipment, and operational practices for work involving infectious or potentially infectious materials or cultures.

- Lab gown must be worn when performing activities with potential pathogens.
- Gloves must be worn when direct skin contact with infected materials is unavoidable.
- Eye protection must be used when there is a known or potential risk of exposure to splashes.
- All procedures that may produce aerosols, or involve high concentrations or large volumes should be conducted in a biological safety cabinet (BSC).
- The use of needles, syringes and other sharp objects should be strictly limited.

All patient specimens are assumed to be potentially infectious. Universal precautions must be followed. Since viable micro-organisms are used, all cultures must be handled with appropriate precautions. All equipment in contact with cultures should be decontaminated by appropriate methods.

**NOTE:** This is a controlled document for internal use only. Any documents appearing in paper form are not controlled and should be checked against electronic version prior to use.

## Print a hardcopy of LIS report:

a) In result entry, select the printer icon on tool bar – select "Instant Report":

- b) Select "Yes" to save and "Ok" to patient discharged
- c) Select the "Print To" pull down menu and choose STH0116 X405
- d) Select "Ok"

4

5

6

e) Report will print on Xerox in Main Laboratory.

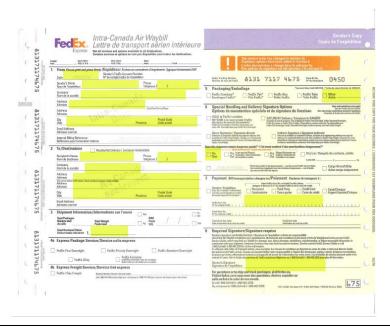

### Order a referred test in result entry screen:

- a) Select "Add Test"
- b) Choose appropriate reference code:

?REFN - NML

- c) Select "Ok"
- d) Add a period (.) in the results line
- e) Final report the test line

## Fill in all sections highlighted in yellow to complete the FedEx Waybill:
