Director, Laboratory and Diagnostic Imaging Services

Accreditation Canada Applicable Standard: NA

# **Uncontrolled When Printed**

## **GUIDING PRINCIPLE:**

Throat swabs, as well as pharyngeal and peritonsillar abscess swabs are submitted for the diagnosis of *Streptococcus pyogenes* pharyngitis or Group A Strep.

# **PURPOSE/RATIONALE:**

This standard operating procedure describes the screening for Group A *Streptococcus* (GAS) in throat specimens.

## **SCOPE/APPLICABILITY:**

This standard operating procedure applies to Medical Laboratory Technologists (MLTs) processing specimens for throat culture.

#### **SAMPLE INFORMATION:**

| Туре                    | Swab  • Amie's with or without charcoal  |  |
|-------------------------|--|--|
| Source                  | Throat swab  |  |
| Stability               | If the sample is received in the laboratory and processed greater than 48 hours from collection:  • Add specimen quality comment: "Delayed transport may adversely affect pathogen recovery"                           |  |
| Storage<br>Requirements | Room temperature   |  |
| Criteria for rejection  | <ol> <li>Unlabeled/mislabeled swab</li> <li>Specimen container label does not match patient identification on requisition</li> <li>Duplicate specimens obtained with same collection method within 24 hours</li> </ol> |  |

**Disclaimer Message:** This is a **CONTROLLED** document for internal use only. Any documents appearing in paper form are not controlled and should be checked against the electronic file version prior to use.

# **REAGENTS and/or MEDIA:**

- Blood agar (BA)
- Identification reagents: catalase and Strep latex test

### **SUPPLIES:**

- Disposable inoculation needles
- Wooden sticks
- Glass test tubes

- Sterile pipettes
- Anaerobic jar, pack, and indicator

# **EQUIPMENT:**

- Biosafety cabinet
- 35° ambient air incubator
- VITEK 2 and supplies

## **SPECIAL SAFETY PRECAUTIONS:**

Containment Level 2 facilities, equipment, and operational practices for work involving infectious or potentially infectious materials or cultures:

- Ensure that appropriate hand hygiene practices be used
- Lab gown must be worn when performing activities with potential pathogens
- Gloves must be worn when direct skin contact with infected materials is unavoidable
- Eye protection must be used when there is a known or potential risk of exposure of splashes
- All procedures that may produce aerosols, or involve high concentrations or large volumes should be conducted in a biological safety cabinet (BSC)
- The use of needles, syringes and other sharp objects should be strictly limited

All patient specimens are assumed to be potentially infectious. Routine Practices must be followed. Since viable micro-organisms are used, all cultures must be handled with appropriate precautions. All equipment in contact with cultures should be decontaminated by appropriate methods.

# **QUALITY CONTROL:**

Refer to Test Manual for reagent quality control procedures

#### PROCEDURE INSTRUCTIONS:

| Step                                | Action  |  |  |  |
|-------------------------------------|---|--|--|--|
| Processing swabs for throat culture |   |  |  |  |
| 1                                   | <ul> <li>In the biosafety cabinet:</li> <li>Inoculate BA with the swab</li> <li>Ensure all surfaces of the swab make contact with the agar</li> <li>Streak for isolated growth using a disposable inoculation needle</li> </ul> |  |  |  |
| 2                                   | <ul> <li>Incubate the media:</li> <li>Place BA in the CO<sub>2</sub> incubator in throat rack to be set up in anaerobic jar by evening technologist</li> </ul>  |  |  |  |

# **INTERPRETATION OF RESULTS:**

| Step | Action   |   |  |  |
|------|--|---|--|--|
| 1    | <ul> <li>Observe BA plate at 24 hours and 48 hours</li> <li>Examine for large (&gt;0.5 mm), beta hemolytic colonies resembling GAS</li> </ul>  |   |  |  |
| 2    | <ul> <li>If no large, beta-hemolytic Streptococci colonies seen at 18 to 24 hours:</li> <li>Record observations in the LIS</li> <li>Re-incubate plates anaerobically for an additional 24 hours</li> </ul> |   |  |  |
| 3    | If no large, beta-hemolytic Streptococci colonies seen at 48 hours:  Record observations in the LIS  Workup complete  GAS not isolated   |   |  |  |
| 4    | If large colony, beta-hemolytic Strep. colonies are seen:  Record observations in the LIS  Perform Strep latex test for Group A  |   |  |  |
|      | IF   | THEN  |  |  |
| 5    | Strep A latex test NEGATIVE Strep A latex test   | <ul> <li>Record observations in LIS</li> <li>Workup complete, GAS not isolated</li> <li>Record observations in LIS</li> </ul> |  |  |
|      | POSITIVE   | GAS isolated  |  |  |

**NOTE:** Each Streptococcus grouping latex test should be tested with at least one extra grouping latex suspension as a negative control

# **REPORTING INSTRUCTIONS:**

| IF   | REPORT   |
|--|--|
| GAS not isolated   | Report:     "No Streptococcus pyogenes (Group A)     isolated"   |
| GAS isolated and clinical history does not indicate:  History of penicillin allergy Recurrent pharyngitis Treatment failure Current therapy with erythromycin or clindamycin If requested by physician | <ul> <li>Choose key 4 on STRA keypad to add isolate: "Streptococcus pyogenes (Group A)"</li> <li>List quantitation as "Isolated"</li> <li>The following isolate comments will be added: &amp;2109 and &amp;A373</li> </ul>                   |
| GAS isolated and clinical history does indicate: History of penicillin allergy Recurrent pharyngitis Treatment failure Current therapy with erythromycin or clindamycin If requested by physician      | <ul> <li>Choose key 5 on STRA keypad to add isolate: "Streptococcus pyogenes (Group A)"</li> <li>List quantitation as "Isolated"</li> <li>VITEK AST-ST03 panel will be ordered</li> <li>Report susceptibility results as per ASTM</li> </ul> |

#### LIMITATIONS:

 A negative throat culture does not eliminate the possibility of a throat infection. Inadequate specimen collection, improper specimen handling, low organism levels in the specimen or overgrowth with normal oral microorganisms may yield a false negative result.
