

TRAINING UPDATE

Lab Location: GEC, SGAH & WAH
Department: Mgmt & QA

Date Distributed: 3/21/2014
Due Date: 4/15/2014
Implementation: 4/15/2014

DESCRIPTION OF PROCEDURE REVISION

Name of procedure:
Unannounced Inspection Process GEC / SGAH / WAH.QA29 v3
Description of change(s):
Section 5: Removed prepare annotated checklists for each section. Section 9: Updated Attachments A, B and C
This revised SOP will be implemented on April 15, 2014

Document your compliance with this training update by taking the quiz in the MTS system.

Approved draft for training all sites (version 3)

1. PURPOSE

This procedure defines a process to prepare for unannounced inspections by regulatory agencies.

2. SCOPE

This procedure applies to all laboratory staff.

3. RESPONSIBILITY

The laboratory management team is responsible for duties and tasks assigned within this procedure.

The Senior QA Specialist is responsible for the content and periodic review of this procedure.

4. DEFINITIONS

None

5. PROCEDURE

Prior to the Inspection

1. Identify primary and back-up staff for each area of the lab, who will have knowledge of procedures, policies, and location of key documents (e.g., QC, PT, QM, training and competency, instrument validation, AMR records).
2. Identify inspection day tasks and assign primary and backup staff for each task (see attachment A)
3. Develop a phone list of primary and backup staff to contact upon the arrival of the inspection team. List should include medical director, managing director, lab manager and section head supervisors. If the lab needs additional FTEs on the day of the inspection, a list of staff who has previously indicated the ability to work on short notice should also be available.
4. Develop a process for timely retrieval of off-site records, such as personnel training records and initial instrument/method validation studies. Store onsite documents and records in a central location so that they are easily accessible during the

inspection. Ensure that relevant staff knows how to locate or retrieve the documents and records.

5. Identify options for workspace that can be used by the team. Space can either be in the laboratory, in an area designated for clerical/administrative services, or elsewhere in the institution that is convenient to the lab.
6. If the inspection team has to travel from site to site, develop maps and identify possible modes of transportation in the event the team has not previously made arrangements.
7. Train all staff so that they are familiar with the Checklists and the inspection process. Show the video that is included with the reapplication process to reinforce the general CAP approach to inspections and familiarize staff on what to expect. Unannounced inspections should be an on-going agenda item at lab meetings to increase communication and provide preparedness updates.

Inspection Day

1. Activate the inspection day task list and refer to it as necessary during the day. Refer to attachments A and B.
2. Assemble required documents and materials. Refer to attachment C

6. RELATED DOCUMENTS

Records Management Process, Transfusion Service, Blood Bank Procedure
