## LABORATORY ALERT

Subject: Lab Staff Required to Verify Courier Log Temp Check

The Laboratory is informing you of the following task assignment:

Support microbiology cultures.Temperature Range:30 – 37 CResponsibility:AHC Lab staff (primarily specimen processing staff, however technical staff may need to provide backup): 1. Ensure courier has recorded temperature for the currer 2. Verify the temperature is within correct temperature 3. Sign with your tech code if the temperature is in the temperature range. 4. Report immediately to a Supervisor, Manager or Director the temperature is outside the range BEFORE RELE microbiology cultures to the courier.Additional information:If the courier does not have an incubator, DO NOT release microbiology plates/cultures. Hold until next run, write a QV and report to a Supervisor, manager or Director. While hold plates has an adverse impact on turnaround time, cultures wi protected.Contacts:Samson Khandagale, Manager
