## TRAINING UPDATE

**Date Distributed:** 

Lab Location: Department: GEC, SGMC & WAH

Core **Due Date:**Implementation:

11/13/2015 12/31/2015 **1/1/2016** 

### **DESCRIPTION OF REVISION**

Name of procedure:

Chemistry Receipt and Check-in Log (3 pages) AG.F337.0 Coag, Hem and UA Check-in Log (2 pages) AG.F338.0 Serology Kit Check-in Log (1 page) AG.F339.0

**Description of change(s):** 

The electronic forms currently in use are being put under document control. Note the following changes to these forms –

- Package insert issue **date** will be recorded. Expectation is to compare the insert rec'd with the shipment against the insert saved in the lab. Appropriate action if the date is different is described in instruction #4 at bottom of the sheet
- Instructions at the bottom of the form are updated. Steps 2 & 3 have been worded to reflect necessary testing based on whether the product is reagent, QC or calibrator.

Revised FORMS will be implemented on January 1, 2016

Document your compliance with this training update by taking the quiz in the MTS system.

# Chemistry Reagent Receipt Log Reagent: \_ **Comments** Cal/QC Package Date Qty Log in Tech Validation acceptable? **Validating** Date lot # **Insert Issue** code (Y/N) Tech date Received Received Lot # Exp. Date date placed in use

### Instructions:

- 1. All chemistry reagents received in Lab MUST be recorded on this form.
- 2. If the reagent is the same lot number as the lot currently in use, run all levels of the current controls on the new shipment and document appropriately in Unity software.
- 3. If the shipment is a new lot, then follow current procedures for Calibration and Quality Control.
- 4. If the package insert revision date has changed, make a copy of the current and new inserts and forward to the technical specialist or supervisor for review and SOP update as necessary.

|                            |                 |      |           |                     |                           |                                   |  |  |                               |  |          |
|                            |                 |      |           |                     |                           |                                   |  |  |                               |  |          |

### Instructions:

- 1. All chemistry QC received in Lab MUST be recorded on this form.
- 2. If the QC is the same lot number as the lot currently in use, run all QC levels of the new shipment with the current reagent lot and document appropriately.
- 3. If the shipment is a new lot, then follow current procedures for correlation and quality control.
- 4. If the package insert revision date has changed, make a copy of the current and new inserts and forward to the technical specialist or supervisor for review and SOP update as necessary.

|                                    |                 |      |           |                     |                             |  |                         |                                 |          |  |  |

#### Instructions:

- 1. All chemistry calibrators received in lab MUST be recorded on this form.
- 2. If the calibrator is the same lot number as the lot previously or currently in use, please indicate on this log-in form and document appropriately.
- 3. The technical personnel who scans the calibrator data into the Vistas/Centaur for the first time is responsible for the documentation of successful first calibration section of this document.
- 4. If the package insert revision date has changed, make a copy of the current and new inserts and forward to the technical specialist or supervisor for review and SOP update as necessary.

AG.F337.0 Rev 11/2015

# Coag, Hemo and UA Reagent Check-in Log Reagent: Validation Date lot # Tech placing Log in new lot into Package Insert Date Qty Tech Date Acceptable **Validating** placed in Received Validated (Y/N) Received Lot# Exp. Date Code **Tech Code** use use Issue date Comments

### Instructions:

- 1. All Coag, UA, and Hemo reagents received in Lab MUST be recorded on this form.
- 2. If the reagent is the same lot number as the lot currently in use, run all levels of the current controls on the new shipment and document appropriately.
- 3. If the shipment is a new lot, then follow current procedures for correlation and quality control.
- 4. If the package insert revision date has changed, make a copy of the current and new inserts and forward to Supervisor or Technical specialist for review and SOP update as necessary.

AG.F338.0 Rev 11/2015

## Coag, Hemo and UA QC Check-in Log QC: Validation Date lot # Tech placing Log in Date new lot into Package Insert Date Qty Tech Tested/ Acceptable **Validating** placed in Received Code Validated (Y/N) Received Lot# Exp. Date **Tech Code** use use Issue date Comments

### Instructions:

- 1. All Coag, UA, and Hemo QC received in Lab MUST be recorded on this form.
- 2. If the QC is the same lot number as the lot currently in use, run all QC levels of the new shipment with the current reagent lot and document appropriately.
- 3. If the shipment is a new lot, then follow current procedures for correlation and quality control.
- 4. If the package insert date has changed, make a copy of the current and the new insert and forward to the technical specialist or supervisor for review and SOP update as necessary.

### Instructions:

- 1. All serology kits received in Lab MUST be recorded on this form.
- 2. If the kit is the same lot number as the lot currently in use, run all levels of the current controls on the new shipment and document appropriately.
- 3. If the kit is a new lot, perform a cross check on the new lot with the current lot number or perform a separate run and utilize known positives and negatives from storage for previous (different) lot number.
- 4. If the package insert has changed, make a copy of the current and new inserts and forward to the technical specialist or supervisor for review and SOP update as necessary.
