TRAINING UPDATE

Lab Location: Department:

GEC, SGMC & WAH All staff

Date Distributed:
Due Date:
Implementation:

7/1/2016 7/18/2016 **7/18/2016**

DESCRIPTION OF PROCEDURE REVISION

Name of procedure:

Policy for Authorization of Personnel GEC / SGAH / WAH. QDNQA739 v1.1

Description of change(s):

This is a new QD corporate policy that replaces current one.

Authorization forms are used for Dr Cacciabeve to authorize lab staff to perform their assigned duties.

Current process:

We use a Job Authorization chart that lists all employees who work in a specific section. It is updated every 3 months. Chart is signed by the supervisor and Dr Cacciabeve after every change.

New process:

An Authorization Form is required for testing personnel (techs) and for Non-Testing Personnel who perform pre-analytic or post-analytic duties related to testing.

- It is signed once (upon employee hire) and anytime the employee's job duties or responsibilities change
- Both employee and Dr C must sign

Our lab will continue to use a Job Authorization chart as a quick reference to identify employees who are trained & competent to perform which tests / section / department area.

This revised SOP will be implemented on July 18, 2016

Document your compliance with this training update by taking the quiz in the MTS system.

Non-Technical SOP

1. PURPOSE

This document sets forth the policy and process for the CLIA Laboratory Director to authorize individuals to perform their current duties and job responsibilities.

2. SCOPE

- This policy and process applies to personnel in departments under each CLIA license involved in any phase of the testing process (pre-analytic, analytic and post-analytic). This includes:
 - All Anatomic and Clinical testing departments including AmeriPath and Dermpath Diagnostics laboratories.
 - Specimen Processing
 - Referral Testing
 - Technical Operations
 - Point of Care Testing
- This policy and process <u>does not</u> apply to the following:
 - Warehouse/Materials Management
 - Logistics
 - Client Services
 - Patient Services
 - Information Technology

Notes: At Quest Diagnostics at Germantown Emergency Center, Shady Grove Medical Center and Washington Adventist Hospitals, Client Service and Patient Services (Phlebotomy) adhere to this procedure. Point of Care follows the Adventist HealthCare training process.

Form ID: QDNQA305 v1 issued 8/05/13

Form ID: QDNQA305 v1 issued 8/05/13

3. RESPONSIBILITY

Responsible Party	Task	
Laboratory Director	 Approves the initial document and any subsequent revisions. Authorizes appropriately trained and qualified individuals to perform pre-analytic, analytic, and post-analytic duties. Ensures test systems and associated records of 	
	 employee Training and Competency are maintained by delegated individuals Signs Authorization Documents. Ensures adequate continuing clinical laboratory education programs are available for all personnel. 	
Laboratory Director or Designee	Recurring review of this SOP	
Technical Supervisor	 Implements this process in the area(s) for which he/she is responsible. Ensures applicable documentation of education, experience, and certification is on file according to standard practice. Ensures that each authorized individual successfully completes the appropriate training Ensures employee training records include the level of supervision required, when applicable. Ensures each authorized individual demonstrates competency to perform the applicable test systems. 	
Pre-analytical/Post-analytical	Implements this process in the area(s) for which he/she is responsible.	
Department Manager	 Ensures applicable documentation of education, experience, and certification is on file according to standard practice. Ensures that each authorized individual has successfully completed the appropriate training and demonstrates competency to perform the applicable job assignments for pre-analytical or post-analytical processes. 	
Quality Assurance Department	 Ensures that all Authorization Documents have Laboratory Director approval signature Ensures the original signed Authorization Document is retained according to local document control practice Ensures retired (inactive) Authorization Documents are archived according to record retention policy 	

4. **DEFINITIONS**

- Laboratory Director: An individual qualified to manage and direct laboratory personnel and the performance of moderate complexity or high complexity test performance. The individual who is responsible for the overall operation and administration of the laboratory, including provision of timely, reliable and clinically relevant test results and compliance with applicable regulations and accreditation requirements. This individual is listed on the laboratory's CAP and CLIA certificate (as applicable).
- **Post-analytic Process:** A process that occurs after testing is complete, such as result reporting
- **Pre-analytic Process:** A process that occurs prior to testing, such as patient preparation, specimen collection, identification, preservation, transportation and specimen processing
- **Testing Personnel**: Individuals responsible for performing laboratory assays and reporting laboratory results
- **High Complexity Testing:** Rating given by the FDA to commercially marketed in vitro diagnostic tests based on their risks to public health. Tests in this category are seen to have the highest risks to public health
- **Moderate Complexity Testing:** Rating given by the FDA to commercially marketed in vitro diagnostic tests based on their risks to public health
- **Non-testing Personnel:** Individuals responsible for performing pre-analytic and/or post-analytic tasks which are not technical in nature.

NOTE: The above definitions are derived from the CLIA regulations and/or CAP checklist requirements.

5. POLICY FOR AUTHORIZATION OF PERSONNEL

The laboratory director is responsible for the overall operation and administration of the laboratory. This includes the employment of personnel who are competent to perform test procedures, record and report test results, and for assuring compliance with all applicable regulations.

The laboratory director ensures sufficient numbers of personnel with appropriate educational qualifications, experience, training and competency to meet the needs of the laboratory.

• Each Laboratory Director must document that testing and non-testing personnel involved in pre-analytic, analytic, and post-analytic phases of testing are authorized to perform their assigned duties and responsibilities in the laboratory for which he/she holds a CLIA license and/or CAP certificate.

SOP ID: GEC.QDNQA739 CONFIDENTIAL: Authorized for internal use only SOP Version # 1 Local Version # .1 Page 4 of 7

6. PROCESS FOR AUTHORIZATION OF PERSONNEL DUTIES

6.1 Testing Personnel

Step	Action		
1	According to standard practice, file and maintain documentation of education, experience, certification (if applicable) and training for each employee involved in preanalytic, analytic or post-analytic processes.		
2	Choose the appropriate Authorization Form a Refer to Related Documents.	ccording to level of test complexity.	
3	Enter the printed name of the employee and the Director on the form.	ne printed name of the Laboratory	
4	The Laboratory Director evaluates and verific education, experience, training, and certificate	1 7 11 1	
5	The Laboratory Director signs and dates the Authorization Form, indicating the employee is authorized to perform the duties and responsibilities of testing personnel. NOTE: This is a one time approval by the Laboratory Director and it may be completed at the time of hire.		
6	Employee signs and dates the Authorization Form as confirmation that they understand their duties and responsibilities as testing personnel.		
7	Place the original signed and dated Authorization Form under document control according to local practice (place in employee personnel file). Controlled copies specific to the applicable department must be available to each department.		
8	Update the form only when or if an employee's responsibilities and/or duties change Example:		
	If	Then	
	The employee is authorized to perform high complexity testing and is trained on a new test / bench	No new authorization is required	
	The employee is authorized to perform moderate complexity testing and is trained on a new high complexity test / bench	A new authorization is required	
9	Retire Authorization forms:		
	When an employee form is updated (see step 8)		
	When an employee leaves the compar	ny	
10	Archive retired delegation documents according to standard record retention guidelines.		

Form ID: QDNQA305 v1 issued 8/05/13

Non-Testing Personnel 6.2

Step	Action
1	According to standard practice, file and maintain documentation of training and any applicable experience and/or educational certification (if applicable) for each employee involved in pre-analytic or post-analytic processes.
2	Complete an appropriate Authorization Form for each employee. Refer to Related Documents.
3	Enter the printed name of the employee and the printed name of the Laboratory Director on the form.
4	The Laboratory Director evaluates and verifies that each employee has appropriate training, and education or certification (if applicable).
5	The Laboratory Director signs and dates the Authorization Form, indicating the employee is authorized to perform the pre-analytic or post-analytic duties associated with their job. NOTE: This one time approval by the Laboratory Director may be completed at the
	time of hire.
6	Employee signs and dates the Authorization Form as confirmation that they understand their duties and responsibilities.
7	Place the original signed and dated Authorization Form under document control according to local practice (place in employee personnel file). Controlled copies specific to the applicable department must be available to each department.
8	Update form only when or if an employee's responsibilities and/or duties change.
9	Retire Authorization Forms:
	When an employee form is updated (see step 8)
	When an employee leaves the company
10	Archive retired delegation documents according to standard record retention guidelines.

Job Authorization Summary (Local Process) 6.3

Step	Action	
1	The Job Authorization Summary is a tool used as a quick aid to track which staff are trained for benches or areas. The summary includes	
	Employee names	
	Test systems / Training modules (must match the Training Plan)	
	Key for performance levels	
	Signature space for supervisor / manager and medical director	
2	The summary is updated at least quarterly	
3	Signed and dated Job Authorization Summaries are scanned and retained electronically	
	on a shared drive.	

7. RECORDS MAINTENANCE

Records are maintained according to the requirements published in the Quest Diagnostics *Records Management Program Reference Guide*.

AUTHORIZATION TO PERFORM HIGH COMPLEXITY TESTING

As Laboratory Director, I authorize the following qualified, individual to perform the duties of Testing Personnel as specified in CLIA CFR 493.1495 for High Complexity Testing (below*). The individual is approved to assume duties and responsibilities associated with test systems on which they are trained and competent.

- Test systems and associated records of Training and Competency are on file in the testing department. When applicable, the level of supervision required is maintained with these records.
- Records of Continuing Education are on file according to standard to standard laboratory or departmental practice.
- Quest Diagnostics Standard Job Description for this employee specifies current duties and responsibilities.
- All other required personnel records are on file according to standard Quest Diagnostics HR practices

Laboratory Director Name (print):	
Laboratory Director Signature:	Date:
I understand and will fulfill the responsibilities of Testing F standard CFR 493.1495 (below*):	Personnel as established by CLIA
Employee Name (print):	
Employee Signature:	Date:

*493.1495 STANDARD; TESTING PERSONNEL RESPONSIBILITIES.

The testing personnel are responsible for specimen processing, test performance and for reporting test results.

- (a) Each individual performs only those high complexity tests that are authorized by the laboratory director and require a degree of skill commensurate with the individual's education, training or experience, and technical abilities.
- (b) Each individual performing high complexity testing must-(b)(1) Follow the laboratory's procedures for specimen handling and processing, test analyses, reporting and maintaining records of patient test results;
- (b)(2) Maintain records that demonstrate that proficiency testing samples are tested in the same manner as patient specimens;
- (b)(3) Adhere to the laboratory's quality control policies, document all quality control activities, instrument and procedural calibrations and maintenance performed;
- (b)(4) Follow the laboratory's established policies and procedures whenever test systems are not within the laboratory's established acceptable levels of performance;
- (b)(5) Be capable of identifying problems that may adversely affect test performance or reporting of test results and either must correct the problems or immediately notify the general supervisor, technical supervisor, clinical consultant, or director;
- (b)(6) Document all corrective actions taken when test systems deviate from the laboratory's established performance specifications; and
- (b)(7) Except as specified in paragraph (c) of this section, if qualified under §493.1489(b)(5), perform high complexity testing only under the onsite, direct supervision of a general supervisor qualified under §493.1461.
- (c) Exception. For individuals qualified under §493.1489(b)(5), who were performing high complexity testing on or before January 19, 1993, the requirements of paragraph (b)(7) of this section are not effective, provided that all high complexity testing performed by the individual in the absence of a general supervisor is reviewed within 24 hours by a general supervisor qualified under §493.1461.

Version: 1

AUTHORIZATION FOR NON-TESTING PERSONNEL

As Laboratory Director, I authorize the following qualified, trained individual to perform preanalytic and/or post-analytic tasks that are not technical in nature. They are approved to assume duties and responsibilities associated with tasks and/or test systems on which they are trained and competent.

- Quest Diagnostics Standard Job Description for this employee specifies current duties and responsibilities.
- Records of Training, Competency Assessment, and Continuing Education are on file in the testing department or with other required personnel records according to standard Quest Diagnostics HR practices
