Date: August 30, 2018

LABORATORY ALERT

Subject: DI Rule to Reject Results if Result Date >30 days

The Laboratory is informing you of the following:

Effective date:	August 30, 2018
DI rule for results >30 days old:	A new rule on DI has been created for the Sysmex to reject results with a result date that is greater than 30 days. These will NOT show up on the SM workspace once they are re-sent since they will all be REJECTED
Explanation:	This change was made because staff have been selecting old accession numbers from the Sysmex and re-sending them in error. These results are over writing current accession numbers.
