#### TRAINING UPDATE

Lab Location: Department: GEC, SGMC & WOMC Core Lab 
 Date Distributed:
 3/20/2021

 Due Date:
 4/20/2021

### **DESCRIPTION OF PROCEDURE REVISION**

Name of procedure:

# CTNI (Troponin) Outlier Form AG.F437.4

**Description of change(s):** 

Added a column to record patient MR number

Why? -

We are changing the process to track Tropi TAT outliers by eliminating the need to write a QV form for each instance. (*The MR* # *is needed to log the info into the QV database*)

## New Process –

- At the end of each **shift**, staple a QV form to the **original** outlier log (*there is no need to make any copies*)
- On QV form:
  - $\circ$  check off the site
  - $\circ$  record the date at the top
  - $\circ$  write your tech code and date in those spaces on the QV
- Submit these to your supervisor
- Start a new outlier log at the beginning of every shift

This FORM and QV process will be implemented on April 1, 2021

Document your compliance with this training update by taking the quiz in the MTS system.
