

Lab Alert—Outpatient Infusion Type and Screen (OICTS) Orders

Effective Date:	Monday, December 11, 2023
New Order Information:	<p>We have a new test called the OICTS. OIC will place this order when a patient is being referred to the OIC for transfusion for the first time.</p> <p>This test requires 3 pink blood bank tubes. One of the tubes must contain the BB/TS labeling system.</p>
Background Information:	This orderable will be used for patients being seen in the Outpatient Infusion Center for the first time. We will collect additional sample to prevent having to recall the patient if the specimen needs to be referred to the ARC Reference Lab.
