Specimen Collected by _____
BB history questions verified by _____

Please ask the following questions of all Preadmit patients (or the caregiver with them if they are unable to answer) when there is a "Type & Screen" or "Type & Crossmatch" order.

Circle the answers given:

1. Has the patient been **transfused** within the past 90 days? Yes No

2. Has the patient been **pregnant** within the past 90 days? Yes No

3. Date of surgery, procedure, or transfusion: _____

Guidance:

1. If the answer to both Question 1 and 2 is NO, sample can be drawn up to 14 days prior to the surgery date (or transfusion date.)

2. If the answer to either Question 1 or 2 is YES, sample cannot be drawn early. It must be drawn within 1-3 days of the surgery date.

Note: If the patient has been transfused with red cells or platelets or been pregnant within the past 90 days, they have been exposed to foreign antigens and might create an antibody prior to surgery which could cause difficulty in crossmatching or a possible adverse event.

3. Contact the SJMC Blood Bank with any questions: 127-6654

***After completing the form, return it to the Blood Bank
along with the Typenex blood-banded specimen***
