**Subject:** How does this sound?

Hello team!

### Process Change for Type and Screen Collection and Transfusion for the Neonate

Beginning April 28th.

- We will no longer need to complete the banding process when obtaining a type and screen for the neonate.
- The process for labeling the specimen when obtaining a type and screen for a neonate will be the same as other lab collections.
- We will also begin to transfusing neonates (<4 months) with CMV negative, Irradiated RBCs.
- All neonates <4 months will receive only O Negative units unless approved by the medical director.
- Units given to neonates <4 months do not require crossmatching

These changes are being made in an effort to provide consistency across the service line while also providing great care to our patients.

Please let me know if you have any questions or concerns.

Sincerely,

Jessica
