TEG 6s Hemostasis	 TEG 6s Hemostasis System Go-Live
When:	Tuesday, August 11 th at 10:00 AM
What:	The TEG 6s Hemostasis analyzers and the TEG Manager system will be available in production beginning at 10 AM on Tuesday, August 11 th . The TEG system will be available for cardiovascular surgeries at Moses Cone hospital only. It will be utilized only by authorized anesthesiologists inter-op. The TEG system will not be available beyond this specific use case at this time.
Why?	The TEG system is designed to provide rapid blood analysis to physicians that can help identify clotting factors in the patient's blood, allowing them to make medication decisions inter-op for improved care and patient safety
Questions?	Vendor support staff will be on hand to assist with any questions or issues during the go-live. Staff can also receive TEG support by calling the Haemonetics 24-hour hotline at 1-800-438-2834. General technology questions, please call the Help Desk at 336-832-7242
