

Blood Product Scanning Update: COVID-19 Convalescent Plasma Only

Overview: This is a temporary workflow when scanning COVID-19 Convalescent plasma until the lab system is upgraded later this year.

Scanning blood products:

1) **Scan** 2 barcodes : Unit Number and Unit Blood Type

2) **Manually** enter the **Product Code Number**

3) **Manually** select the Product Name from the drop down, selecting the product name with the matching container number on the unit

- CV19 HI TITER FFP1 TH... = 1st Container
- CV19 HI TITER FFP2 TH... = 2nd Container

Verify and select the product name
