

Procedure Change/Revision (IMM 36-A)

Procedure: VDRL Slide Test - Serum and CSF (IMM 176)

Change/Revision:

To clarify ordering issues the following policies will be adopted:

- 1. If an order for VDRL is received and that order does not specify which VDRL reflex algorithm to perform, VDRL with reflex to titer and FTA will be ordered (VDRLG).**
- 2. Since RPR is not performed in this laboratory, all requests for RPR testing will be given the equivalent VDRL assay. VDRL with reflex to titer and FTA will be ordered (VDRLG).**
