

Weekly Updates

September 26, 2014

Test	Description of Changes	Affected Individuals
Bilirubins	Clarification of orders: The order BiliD previously included both a total and direct bilirubin. This has changed and the order is only for a direct bilirubin. If the provider wants both, they need to order both a BiliD and BiliT.	All Staff
Orange Cards	The orange cards in the reagent bins are an inventory and lot management tool. Please pull the card and give to Sherry/Denelle when the <u>indicated number of flex remain</u> .	All Staff
INR's	We can no longer get the strips for the INRatio2 and will be moving to the CoaguCheck XS. We will work on training everyone and getting a new procedure. We will be comparing the first ten specimens to HCMC. If specimens match, then we can begin testing on the new instrument.	All Staff
QA Database	Hafizur and I made some updates to the database. Most notably, drop down lists of providers and error types. This will go live <u>next week</u> .	All Staff

Procedure Additions, Updates and Changes:
