

# Weekly Updates

September 24, 2015

Test	Description of Changes	Affected Individuals
New locations of...	<p>Recently, a few things found new homes.</p> <ul style="list-style-type: none"> <li>✚ Magazines that were formerly up front by the walkie talkie are now in the library above T2</li> <li>✚ Lot to Lot binder is in the back cabinet under the center island</li> <li>✚ Temp binder is in the drawer that the HIV clipboard is in</li> <li>✚ Draw Room #2 – everything is now in the drawers to facilitate a new computer</li> </ul>	All Staff
DAR	<p>We have been setting up a DAR report for everyone to use. This report acts as a quality checker for NPH Ref lab visits. Please see Denelle if you a) want this report set up for you or b) want to know how this report acts a quality double check for our appointments.</p>	All Staff
Draw Room Computer	<p>The computer was installed on Thursday. We are working towards having the phleb log onto the computer, Cerner and EPIC. The phleb is able to use MTS and work on competencies during down time. The computer can be used to look up minimum volumes or specialty tests. Ideally, I would like the phleb to spend their time in the room. By spending down time in this room, it will relieve congestion at the front desk. The phleb will be notified of work by IM and vice versa the phleb can ask for assistance using IM&gt;</p>	All Staff
Process Changes	<p>Please be thinking about how we can change our process so that the phleb can log-in the specimens right in the draw room. No idea is a bad idea.</p>	All Staff

**Procedure Additions, Updates and Changes:**
