**PURPOSE:**

To assure that the proper clerical checks have been completed in order to provide the correct blood product to the correct patient and to record all pertinent data in the appropriate logs.

**POLICY:**

All checks are performed with the individual signing out the unit.

**PROCEDURE:**

1. To obtain a unit of blood or blood product, a member of the nursing staff must bring
  - a patient demographic label
  - a copy of the blood transfusion record from the folder in the laboratory
  - copy of the order to transfuseIn an emergency, if the transfusion slip is not immediately available, a patient demographic label will be accepted. The patient demographic label is used to record the patient and unit by location in the Blood Usage Log.
2. The unit corresponding to the number on the transfusion record slip is removed from the Blood Bank refrigerator.
3. Patient History in SoftBank is checked. **YOU MUST VERIFY THE FULL NAME AND IDENTIFICATION NUMBERS**
4. The unit number, expiration and product type must match the data on the transfusion record slip, the patient unit label and Patient History in SoftBank. Units that outdate sooner should be used first.
5. The following information must be identical on the patient history card and unit tag:
  - a. Name
  - b. Identification number
  - c. Band number
  - d. Unit number
  - e. Unit expiration date
  - f. Patient blood type
  - g. Unit blood type

6. The following information must be identical on the patient history, unit and patient unit label:
  - a. Unit number
  - b. Unit Type
  - c. Unit expiration date
7. Check the compatibility certification on the requisition and SoftBank is complete. If any of these areas are incomplete or incorrect DO NOT issue the unit until the discrepancy has been resolved.
8. The Unit is observed for color and appearance before issuing. Record date, time and initial. Units with expired dates, hemolysis, grossly icteric color or turbidity due to bacterial contamination are unsuitable for transfusion and should be brought to the attention of the Laboratory Supervisor. If there is any question, DO NOT ISSUE BLOOD, until checking with the Laboratory Supervisor or Medical Director..
9. The individual signing out the unit must enter their full name with designation into SoftBank at issue. Only licensed health practitioners (RN, LPN, physicians) are allowed to receive blood from HRMC blood bank with the exception of OR personnel. A printed copy of the blood transfusion record form with the name of the individual signing out the unit, the technologist initial and date and time of issue must be tagged to the unit before it is taken out of Blood Bank.
10. Remove pilot segments from the unit and attach a unit number label from the back of the unit to the segments and place them in the appropriate day container in the refrigerator. Always leave at least 2 full segments attached to the unit. Pigtails are kept for 10 days following crossmatch.
11. Place unit in biohazard bag and release to floor.
12. The transfusion slip is filed in the designated Blood Bank tray for review.
13. Confirm transfusion after 30 minutes or SoftBank will automatically confirm the transfusion after midnight.
