4/8/2026	1.0	Non-traditional Indications for Cord Blood Transplant

## 6. Fetal screens and Molecular testing

a. If we have sent the patient out for molecular testing, the patient cannot have a fetal screen test done; the results are invalid. Please read the PPI comments and request a KB test!

## 7. Competencies – samples and due times

a. Only perform testing on samples we have assigned for you on your competency.

b. Please be sure to do all you can to complete your competency in the month its due. If we need to stay or come in early for you to have the time to work on it, please let us know so we can make arrangements.

## 8. Multiple Plasma pheresis orders

a. If you are unable to get a plasma pheresis order prepared, please do your best to help out the next shift. Even if you just set it aside, it's a big help.

## 9. KTR samples (purples bags)

a. **REMINDER:** When you are logging in the samples for kidney transplant (KTR) **DO** use the collection time on the sample/form! **Do not** make the collection time the same for both samples.

B. This causes a delay for these patients to get on the transplant list.
