

Ordering Paps and HPV Testing

PURPOSE:

The purpose of this procedure is to provide guidelines for ordering Paps and HPV testing from the Thin Prep pap vial.

SCOPE: This Policy applies to UPMC Hanover

POLICY / PROCEDURE:

Policy note: HPV orders cannot be changed for previously collected and received specimens.

1. Select the Pap and HPV (if desired) when the pap is ordered.
 - LAB 4589 – Pap and HPV Reflex if ASCUS
 - LAB 4590 – Pap and HPV Any Result
 - LAB 4591 – Pap only
 - Indicate choice on manual request (non-Epic providers)

2. HPV testing can be done on a previously collected and received specimen by notifying the lab of the add on HPV request.
 - EPIC providers - Order LAB 3443, High Risk HPV on the pap encounter.
 - Non EPIC providers - submit a request for High Risk HPV using the date of pap collection.
