

Safety Matters – did you know?

Manufacturer Instructions for Use

- Every medical device and patient care item has its own specific (i.e., manufacturer) instructions for use, cleaning, disinfection and storage.
- To ensure safe, quality patient care, these instructions must be followed.
- YNHHS staff can access MIFUs for medical devices and patient care items through the **OneSource** database, available from the [Resources](#) page on the hospital intranet.
