Bridgeport and Milford Campuses Turnaround Time Goals

- Mean determined from median TAT across the Yale New Haven Health System delivery networks
 - Bridgeport and Milford Campuses – Bridgeport Hospital, Greenwich Hospital, Lawrence Memorial Hospital, Westerly Hospital, St. Raphael and York Street Campus – Yale New Haven Hospital and Shoreline Medical Center
- Standard Deviation calculated
- 2 SD Range established and represents the upper and lower limits
 - If data set within control range, no corrective actions are necessary

Bridgeport Campus – Procalcitonin

Performance Improvement Plan

**Lab Outreach Pre-Analytical Quality Indicator Monthly
Review
June 2023**

Average Wait Times

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Average Wait Times
Objective	Calculate the average times from patient check-in/registration to the point of specimen collection for each DN. This metric ensures patient satisfaction and monitors phlebotomists' productivity in each draw station location.
Method	Report from Helix – YNHHS Lab Blood Draw Wait Times report
Definitions	The YNHHS Lab Blood Draw Wait Times report will be pulled monthly across all draw stations.
Expected Actions	To assess each draw station patient, wait-times vs the total number. A summary report will be prepared for the Director. Feedback will be provided to the draw stations.
Benchmarks	Overall rate for patient wait time goal for 15 minutes.

Summary:

January: Overall goal reached for the month. January metrics are BH draw station average 5 minutes overall. One Stop location wait-time was the only location outside of the 15 minutes wait time goal.

February: Overall goal met for the month. February metrics are BH draw stations average 4 minutes overall. One Stop Testing Center was able to meet the patient wait-time of 15 minutes this month.

March: Overall goal met for the month. March metrics are BH stations average 5 minutes overall. Despite One Stop Testing high volume it was able to meet the patient wait-time of 15 minutes this month.

April: Overall goal met for the month. April metrics are BH draw stations average 5 minutes overall.

May: Overall goal met for the month. In May BH draw stations average 8 minutes wait-time with BH Shelton and BH One Stop having a noticeable increase in patient activity.

June: Overall goal for the month was met. In June, BH draw stations averaged 5 minutes wait-time overall.

Butterfly Needle Usage Rate

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Butterfly Needle Usage Rate
Objective	Monitors the butterfly needle usage in the outpatient draw stations. Studies have shown that decreased butterfly needle usage results in less sample hemolysis, decreased costs, and less needlestick exposures.
Method	McKesson Supply Report or Infor Supply Report and Helix Reports – Collection Metrics monthly.
Definitions	We will be measuring the rate of butterfly needle usage vs total encounters.
Expected Actions	To assess each draw station butterfly usage rate. A summary report will be prepared for the Director. Feedback will be provided to the draw stations regarding butterfly usage rates.
Benchmarks	Overall rate for 20% butterfly needle usage rate.

Summary

January: Overall goal reached for the month. Across all the BH locations 20 boxes of butterfly needles were ordered over the course of the month.

February: Overall goal met for the month. Across all the BH locations 16 boxes of butterfly needles were ordered.

March: Overall goal met for the month. Across all the BH locations 16 boxes of butterfly needles were ordered.

April: Overall goal met for the month. Across all the BH locations 20 boxes of butterfly needles were ordered.

May: Overall goal met for the month. Across all the BH locations 16 boxes of butterfly needles were ordered resulting in a 3% decrease in butterfly usage from the previous month.

June: Overall goal met for the month. Across all the BH locations 12 boxes of butterfly needles were ordered resulting in a 5% butterfly usage decrease from April to June.

	Jan	Feb	Mar	Apr	May	Jun
Number of Butterfly Needles	1019	800	800	1000	800	600
Total Number of Patient Draws	9302	9223	10958	8888	9996	9910
ALL DRAW STATIONS	11%	9%	7%	11%	8%	6%

Cancel/Redraw Rates

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Cancel/Redraw Rates
Objective	Monitors the cancel/redraw rates in the draw stations by measuring the number of cancel/redraws to overall samples collected as a percentage rate.
Method	Report on Helix – Redraw Rejection Cancellation and Lab Outreach Collection Metrics reports monthly.
Definitions	This metric will identify any collection procedure noncompliance and identify any areas that phlebotomists need retraining in. The redraw rates will be pulled monthly and compared to the 2022 metrics.
Expected Actions	To assess draw station locations, cancel/redraw rates. A summary report will be prepared for the Director to be discussed monthly. Feedback will be provided to the draw stations for improvements.
Benchmarks	Overall redraw rate goal of 5%.

Summary:

January: Overall goal reached for the month. Majority of locations had a cancellation rate of 4% or less.

February: Overall goal met for the month. There has been an increase in redraw and cancellations across all the locations.

March: Overall goal met for the month. There has been an increase in redraw/cancellations at the same locations from February.

April: Overall goal not met for the month. There has been an increase in redraw/cancellations at 7 or the 16 locations for April.

May: Overall goal not met for the month. There has been an increase in redraw/cancellations at 8/16 locations for May, this month's cancel/redraw rate is 5.4%.

June: Overall goal for the month was met. There has been a decrease in cancel/redraw rate across 7/16 locations resulting in a 0.4% decrease. This month's cancel redraw rate is 5%.

Centrifuge Compliance

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Centrifuge Compliance
Objective	Ensures centrifuges in the draw station are functioning as intended which will result in better quality samples and decrease processing errors and specimen rejections.
Method	Auditing centrifuges and record service reports. BioMed (TriMedx) service reports will save in DN specific folders.
Definitions	Every month each DN will be audited on the number of compliant centrifuges and be given a compliance percentage. For example, if all 32 centrifuges in the YNH area are serviced before the due date then they will be at 100% compliance every month.
Expected Actions	The team will also be keeping centrifuge records up-to-date for compliance across all Delivery Networks. A summary report will be prepared for the Director.
Benchmarks	Overall centrifuge compliance goal of 100%.

Summary

January: Overall goal for the month was met. All centrifuges are update with inspections.

February: Overall goal for the month was met. All centrifuges are up-to-date.

March: Overall goal for the month was met. All centrifuges are up-to-date.

April: Overall goal for the month was met. All centrifuges are up-to-date.

May: Overall goal for the month was met. All centrifuges are up-to-date.

June: Overall goal for the month was met. All centrifuges are up-to-date.

ALL DRAW STATIONS	100%	100%	100%	100%	100%	100%

Patient Satisfactory Survey

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Patient Satisfactory Survey
Objective	Achieving high levels of satisfaction is directly dependent on the high-quality patient care provided by phlebotomists in draw stations. In order to find out the pain-points of patients, whether there's any room for improvement, and what measures can be implemented to enhance services.
Method	Key Survey Reports and Press Ganey surveys scores
Definitions	The Key Survey report will be pulled monthly.
Expected Actions	To assess each draw station the patient experience surveys or scores. A summary report will be prepared for the Director. Feedback will be provided to the draw stations to make improvements to help increase patient satisfaction.
Benchmarks	Overall patient satisfaction rate 90%.

Summary

January: Overall goal not for the month. January patient satisfaction rate was 60%. Across a portion of the draw station locations 70% of patients were likely to recommend our facilities to a friend, 100% of patients felt our facilities were neat and clean, and 100% of patients felt they were treated with respect during their visit.

February: Overall goal for the month was met. Across the BH draw station locations 96% of patients were likely to recommend our facilities to a friend, 99% of patients felt our facilities were neat and clean, and 97% of patients felt they were treated with respect during their visit.

March: Overall goal for the month was met. Across the BH draw station locations 100% of patients were likely to recommend our facilities to a friend, 100% of patients felt our facilities were neat and clean, and 100% of patients felt they were treated with respect during their visit.

April: Overall goal for the month was met. Across the BH draw station locations 95% of patients were likely to recommend our facilities to a friend, 100% of patients felt our facilities were neat and clean, and 91% of patients felt they were treated with respect during their visit.

May: Overall goal for the month was not met. Across the BH draw station locations 89% of patients were likely to recommend our facilities to a friend, 94% of patients felt our facilities were neat and clean, and 89% of patients felt they were treated with respect during their visit.

June: Overall goal for the month was not met. This month there was not a substantial amount of data from the surveys received. Across the BH draw station locations 87% of patients were likely to recommend our facilities to a friend, 100% of patients felt our facilities were neat and clean, and 100% of patients felt they were treated with respect during their visit

June Patient Satisfaction Rate 87%

Transcription Accuracy Rate

Section	Lab Outreach/Phlebotomy
Phase	Pre-Analytical
Title	Transcription accuracy rate
Objective	Monitors the accuracy of the phlebotomist's transcriptions into EPIC from paper requisitions.
Method	Report run by Lab Billing department daily.
Definitions	Report is run by Lab Billing, and they randomly select up to 5 transcribed requisitions from each DN daily. The areas evaluated for accuracy will be the provider's name, tests ordered, scanning of req into EPIC and charges. Lab Billing will track the requisitions selected and errors in a separate spreadsheet on the YNH :/L shared drive.
Expected Actions	To assess each draw station transcription accuracy. A summary report will be prepared for the Director. Feedback will be provided to the draw stations.
Benchmarks	Overall rate for 90% transcription accuracy.

Summary

January: Overall goal reached for the month. For the month of January the # of providers transcribed correctly 102/103, sum of tests transcribed correctly 392/396 and # of requisitions scanned in EPIC 51/65.

February: Overall goal for the month has been met. For the month of February the # of providers transcribed correctly 60/60, sum of tests transcribed correctly 204/206 and # of requisitions scanned in EPIC 14/24.

March: Overall goal for the month has been met. For the month of March the # of providers transcribed correctly 116/116, sum of tests transcribed correctly 329/329 and # of requisitions scanned in EPIC 35/45.

April: Overall goal for the month was met. For the month of April the # of providers transcribed correctly 101/101, sum of tests transcribed correctly 313/318 and # of requisitions scanned in EPIC 34/48.

May: Overall goal for the month was met. For the month of May the # of providers transcribed correctly 105/106, sum of tests transcribed correctly 389/391 and # of requisitions scanned in EPIC 103/103.

June: Overall goal for the month was met. For the month of June the # of providers transcribed correctly 110/110, sum of tests transcribes correctly 527/528 and # of requisitions scanned in EPIC 108/108.

Bridgeport Hospital

Department of Laboratory Medicine

Teodorico Lee MPH, Christine Minerowicz M.D., Edward Snyder M.D.,
Laura Buhlmann M.S., Melissa Morales B.A.

<p>SMART Aim <i>Specific-Measurable-Actionable-Relevant-Timely</i></p>	<p>Increase the critical result notification compliance with our 30-minute goal to 95% at Bridgeport Hospital The 30-minute time period is from the moment the critical value is final verified to the moment the communication log in Epic is completed.</p> <ul style="list-style-type: none"> We are currently at 91.0% compliance as a department.
<p>Key drivers <i>measurable processes impacting the outcome</i></p>	<p>Decrease the time from result verification to communication log completion.</p> <ul style="list-style-type: none"> Increase performance of correct workflow (verify result first and then notify provider). Timely communication of outpatient critical values
<p>Interventions <i>actions/changes necessary to impact key drivers</i></p>	<p>Standardize critical call list workflow</p> <ul style="list-style-type: none"> Provided re-education and tips and tricks for the correct workflow. Identified a process to streamline outpatient critical calls (work with specific practices with known notification issues).
<p>Results* <i>accomplishments, modifications, barriers</i></p>	<p>Accomplishments</p> <ul style="list-style-type: none"> July 2022 had a 94.9% compliance (highest in the 12 month period of July 2022-June 2023). Department of Laboratory Medicine averages approximately 1500 critical calls per month.

Note: There is an additional system project to standardize critical result notification workflow.

- Will allow reports and metrics to be standardized as well

Bridgeport Hospital Department of Laboratory Medicine Critical Call Percent Compliance 91.8% (cumulatively) 7/1/2022-6/30/2023

Bridgeport Campus Critical Call Percent Compliance 91.7%

7/1/2022- 6/30/2023

Milford Campus Critical Call Percent Compliance 92.8%
