Subject: Cerner Millennium Event - Code Upgrade 5/7/2022 10 pm through 5/8/2022 5 am

**SYSTEM:	Cerner Millennium including Pathnet Blood Bank, General Lab, Microbiology, Medical Device Interfaces, PowerChart and interruption of interfaces with CoPath and LifePoint
**DATE:	Saturday, May 7th at 10:00 pm to Sunday, May 8th at 5:00 am
**Notes:	<p>The Cerner Millennium system will be upgraded the weekend of May 7th.</p> <p><u>Cerner will be continuously available while the upgrade occurs.</u> No downtime is planned for the upgrade, but we ask you to prepare as if the system will be down. Ensure you are staffed appropriately and have the necessary supplies such as downtime labels.</p> <p>Clinical reporting of paper charts and faxes will not be available during the event.</p> <p>There will be interface interruptions to CoPath, LifePoint, reference laboratory, client, and instrument interfaces during the first two hours of the event.</p> <p>- <u>Autoverification validation is required post upgrade.</u> The regression testing is to verify unexpected changes did not occur with the upgrade. You will be responsible for storing the documentation and having it available for CAP inspections.</p> <p>Please contact the IU Health Service Desk for any questions or concerns.</p>
**Audience:	This message was sent to all Laboratory Cerner Users.

Lab IS Update

Date: 04/21/2022

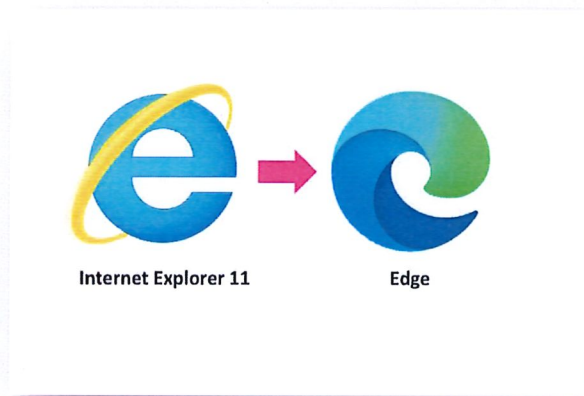

Topic: FAQ - Cerner Upgrade to Code Level 2018.10 on 05/08/2022

Audience: All Cerner Users in the Laboratory

Overview: This document summarizes changes to be expected with the Cerner Upgrade.

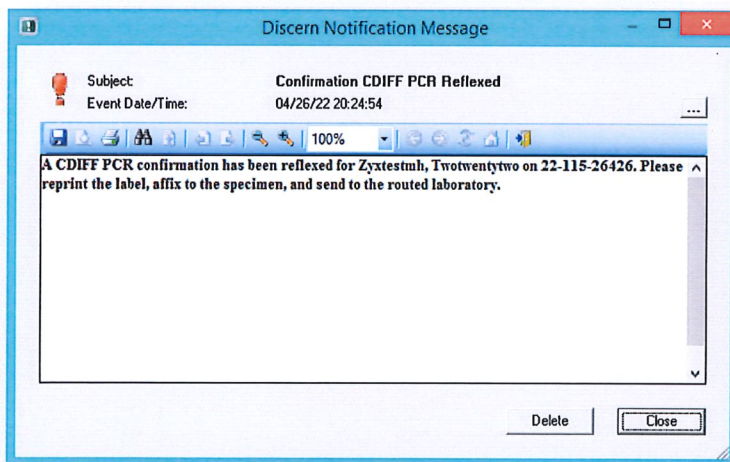

Cerner Default Browser from Internet Explorer to Edge

- Default browser for Cerner help pages and applications including MPages has been switched from Internet Explorer to Edge.

Users correctly receive Discern Notification messages.

- Users correctly receive Discern Notification messages.

Performance Enhancements increases response times in DOE, ARE, Batch Result Entry and Instrument Activity Monitor

- When you select an orderable item in Department Order Entry, the system now displays the order details as expected. Previously, the system took too long to display the order details.

Department Order Entry - Order Entry

- Instrument Activity Monitor now fetches the activities for general laboratory test sites without any delay for a defined time range.

ARE no longer terminates after closing Appbar

- When you access the Instrument Queue mode in Accession Result Entry (AccessionResultEntry.exe) and close the Cerner Appbar, Accession Result Entry now works as expected if the Instrument Assignment preference is selected. Previously the application terminated after closing the Appbar.

Microbiology reports are now opened in forefront

- Microbiology report is now displayed as expected in Microbiology Inquiry and Order Result Viewer. Previously, the Microbiology report opened in the background in Inquiry and Order Result Viewer.

Lab FAQs for documentation of user review
Cerner 2018.10 Code Upgrade that goes into production on 5/8/2022

Function	Issue
Cerner Default Browser	Default browser for Cerner help pages and applications including MPages has been switched from Internet Explorer to Edge.
Discern Notification Messages	Users correctly receive Discern Notification messages.
Department Order Entry (DOE)	When you select an orderable item in Department Order Entry, the system now displays the order details as expected. Previously, the system took too long to display the order details.
Accession Result Entry (ARE) & Batch Result Entry	Accession Result Entry and Batch Result Entry now perform as expected when a patient is associated with a large result history. Previously, the applications took too long to respond.
Instrument Activity Monitor	Instrument Activity Monitor now fetches the activities for general laboratory test sites without any delay for a defined time range.
Accession Result Entry (ARE)	When you access the Instrument Queue mode in Accession Result Entry and close the Cerner Appbar, Accession Result Entry now works as expected if the Instrument Assignment preference is selected. Previously the application terminated after closing the Appbar.
Order Result Viewer Microbiology Report	Microbiology report is now displayed as expected in Microbiology Inquiry and Order Result Viewer. Previously, the Microbiology report opened in the background in Inquiry and Order Result Viewer.

I have read and understand the changes to the Cerner system for the 2018.10 upgrade.
