

New Documentation Entry Points Added

Users can now document the following in the I/O / I-Flowsheet Apheresis System Set Up and Pre-Procedure sections:

> Set up by
> Verified Apheresis Machine and Lines Primed

Machine Ready for Patient Connection

Important

The apheresis machines and the

machines are set up and primed

Since this process sometimes

involves one or two nurses, it is

from priming, as well as

being primed, and

prior to the procedure.

Document the set up separately

Document validation of the lines

Document machine being ready

before use by the nurses.
